

Please share your responses to the following questions and please ensure you include your address as well as at least 3-5 pictures of the current space from a distance so we can see the entire house in at least several of them:

1. What type of project do you have in mind? Do you have an existing deck or outdoor living space currently? If yes, then please share any details on the size/dimensions of the space so that we can determine the cost of the demo phase as well please (if applicable to your project).

2. Have you done any research about your project before you contacted All Decked Out? If so, what have you learned? Are there any specific questions you have up front that we can try and help with?

3. Do you have a septic system or any other yard abnormalities that we should be aware of? Do you know if you have any setback requirements for your neighborhood or the local zoning code? If you are not sure we advise you to call your local zoning office and ask about your address specifically; you can tell them you are considering updating your backyard and want to know if there is anything to be aware of? We would help guide you through any situation but please know it is always better to know up front so we can design accordingly.

4. Do you have a budget for this project? What is your target amount? The starting price point for most of our deck projects is around \$30,000 and beyond but obviously each project is different and that is why we want to learn more about you to better guide you.

5. What materials are you considering using (if known)? FYI - Our focus is on using only low maintenance materials so that means we no longer offer wood decking unless it is exotic hardwoods. What is the size or measurements you are considering for your space (if known)? We realize that not everyone will know exactly what is best but if you can start out with a gauge on the size/square footage then that is how we can share with you the initial pricing information to give you the range. If you can't or don't know we can still do our best to help you.

6. What qualities are most important to you when hiring a company to work for you and your family? How will you decide which company to partner with for your project?

7. What is your main plan for space? To entertain? To dine? To relax? We love to understand the motivation behind the project as that can help us design well for your family.

8. How long do you plan on residing at your home? This can really help us to guide you more appropriately on what materials you should use?

9. How will you decide which company to partner with for your project? And who will be the decision makers? We do ask that if there is more than one in the family then we would love to meet with all persons at the consultation.

10. Do you currently know your design plan or are you open and looking for our design build expert to guide you through a fun and custom process to get the design determined?

11. May we please have your full address? Best phone number to reach you at?

12. How did you hear about All Decked Out? We love to thank our referrals!

13. Please also include several pictures of the back of your house and any design pictures you have found on our website or internet as well so we may be able to get a sense of what you are looking for and what style you like. **YOU CAN ATTACH THIS AND THE PICTURES/IDEA IMAGES TO THE EMAIL YOU RESPOND BACK TO US WITH PLEASE.**
